

Dear all,

Please find below the daily C19 update, which can be shared more widely.

Please remember to **STAY ALERT, CONTROL THE VIRUS, SAVE LIVES**

With best wishes,

Matthew Hicks
Leader, Suffolk County Council

Nicola Beach
Chief Executive, Suffolk County Council

Stuart Keeble
Director of Public Health, Suffolk County Council

Current UK Risk Level: HIGH

The [risk to the UK](#) remains high (as of 13/03/2020).

As of week commencing 11/05/2020, we're moving into Phase two (Smarter controls) of the Government's [recovery strategy](#). The country is also moving [from Level 4 to Level 3](#) by the new COVID Alert System and taking the first step in relaxing lockdown measures.

Please note the Government's messaging has changed from 'stay at home, protect the NHS, save lives' to 'stay alert, control the virus, save lives'

Current UK Situation

- As of 9am on 14 May, 1,593,902 people have been tested, of which 233,151 tested positive. As of 5pm on 13 May, of those tested positive for coronavirus in the UK, 33,614 have died. You can view the latest UK dashboard and cases by local authority [here](#). Confirmed cases in Suffolk are broken down by Districts & Boroughs as follows:

<i>Ipswich</i>	<i>315</i>	<i>229.0 per 100,000 resident</i>
<i>East Suffolk</i>	<i>531</i>	<i>213.9 per 100,000 resident</i>
<i>Mid Suffolk</i>	<i>156</i>	<i>152.2 per 100,000 resident</i>
<i>Babergh</i>	<i>134</i>	<i>146.6 per 100,000 resident</i>
<i>West Suffolk</i>	<i>190</i>	<i>106.2 per 100,000 resident</i>
<i>Suffolk</i>	<i>1,326</i>	<i>174.8 per 100,000 resident</i>

- Government's Daily Press Conference: 14 May – transcript [here](#).
 - Transport Secretary described how the time during lockdown has been used to fix and upgrade road and rail infrastructure, including plans to help the economy bounce back. For example, we opened the vital A14 upgrade 7 months ahead of schedule, which will dramatically improve access to the UK's largest container port at Felixstowe and permanently boost the distribution of goods around the UK.
 - We're asking the public to help ensure that the transport system does not become significantly overwhelmed by returning commuters.** The guidance makes clear, that if you can't walk or cycle but you do have access to a car, please use it, rather than travelling by public transport.
 - Now we want to keep this momentum going. If building a new hospital takes 2 weeks, why should building a new road still take as long as 20 years? We must examine why it is that bureaucratic bindweed makes British infrastructure some of the costliest and slowest in Europe to build.
 - Press conference slides with the latest data from COBR coronavirus fact file (transport use, new cases, hospital admissions, deaths) and datasets available [here](#).
 - View past press conferences on [YouTube](#)

- [70 million face masks for NHS and care workers through new industry deal](#) - Government agrees deal with technology company Honeywell to manufacture these masks in the UK. The production line has capacity to produce up to 4.5 million masks each month and will create 450 new jobs at the Scotland production site.
- [Government grants Transport for London funding package worth £1.6 billion](#) – This is aimed to deal will increase services to help make sure people can follow social distancing guidelines while travelling and further boost for active travel through new segregated cycle lanes and wider pavements.
- [NHS England: Identifying a clinical lead for all care homes \(letter\)](#) – by 15 May (today), Clinical Commissioning Groups have been tasked to identify a named clinical lead for each CQC-registered care home in their area. This clinician will provide clinical leadership for the primary care and community health services support to the care home, and is responsible for the co-ordination of the service provision set out in the [1 May letter](#) to the care home residents.
- [NHS England: The national flu immunisation programme 2020/21 \(letter\)](#) - It is more important than ever that we have effective plans in place for the 2020/21 flu season to protect those at risk, prevent ill-health and minimise further impact on the NHS and social care. Relevant providers are asked to urgently review vaccine orders now to make sure the number of vaccines ordered meet at least national ambitions and previous uptakes rates, whichever is highest. In 2020/21 groups eligible for the NHS funded flu vaccination programme are the same as last year, although this may change if the programme is expanded.
- [NHS Roadmap To Safely Bring Back Routine \(non-urgent or emergency\) Operations](#) – This includes requiring patients to isolate themselves for 14 days and be clear of any symptoms before being admitted. Testing will also be increasingly offered to those waiting to be admitted. Those requiring a long hospital stay will be re-tested between 5 and 7 days after admission, and those who are due to be discharged to a care home will be tested up to 48 hours before they are due to leave.
- [BMJ: Interpreting a covid-19 test result](#) - Although aimed at professionals, this article provides useful and helpful information about the accuracy of covid-19 tests
- [BBC: Unions representing more than a million health service workers have said the NHS must put safety first when routine operations and clinics resume](#). They are demanding "plentiful" supplies of personal protective equipment and access to rapid testing for Covid-19. The unions also say staff who worked through the crisis should be paid overtime and a public sector pay freeze should be ruled out.
- [BBC: Teachers' Unions demand assurances over 1 June school plan](#) - Teachers' unions are to meet the government's scientific advisers later to seek assurances that it will be safe to open schools in England from June.
- [BBC: How exposed is your job?](#) - Almost all the jobs that have a high exposure to both disease and other people are healthcare professions. Cleaners, prison officers and undertakers are among those who have relatively high exposure, but the people who might be most at risk are those who have lots of close contact with people, but aren't used to being exposed to disease - bar staff, hairdressers and actors fall into this category, as well as taxi drivers and bricklayers.
- [BBC: How much will coronavirus cost the UK?](#) - It could be as much as £298bn just for this financial year. To put it into context: before the crisis, the government was expecting to borrow around £55bn. At first the government will raise money by borrowing from investors. They could be individuals, companies, pension funds, or foreign governments who lend the money to the UK government by buying bonds. The Bank of England will buy some of those bonds (also known as quantitative easing). The deficit leaves the government with a choice: increase borrowing, raise taxes, or cut spending. In the end, it may well do a mixture of the three - but those decisions haven't been taken yet.

Suffolk

First response mental health service: National and local evidence shows a drop in the number of people accessing mental health services during the coronavirus outbreak. It is important that Suffolk people know that help is available all day, every day. The *FirstResponse* service, launched by Norfolk and Suffolk NHS Foundation Trust, is available 24 hours a day, seven days a week and provides immediate advice, support and signposting for people with mental health difficulties. If you are experiencing something that makes you feel unsafe, distressed or worried about your mental health you can now call the helpline on **0808 196 3494**. For more information visit; www.nsft.nhs.uk/Find-help/Pages/Help-in-a-Crisis.aspx

Facemasks for babies: Following on from the government's advice that people should wear face coverings in public, Suffolk Safeguarding partnership are urging parents not to use facemasks on babies under two years old. A baby of this age has a smaller airway and breathing through a mask is harder for them. Using an infant mask can increase their risk of choking or suffocating.

Central Government Guidance for reopening of schools: The government have produced a planning guide for primary school leaders to help prepare them to open their schools for more pupils during the coronavirus outbreak. [Click here](#) to read the guidance.

CAS Webinars:

- Let's Talk Volunteering: CAS are holding an online networking event for people who are managing volunteers. The event will take place on Tuesday 19 May 2020 2pm – 3pm. To sign up or for more information [click here](#)
- Covid-19 - Making strategy work: CAS are holding a FREE webinar on Monday 18th May at 11am. Elizabeth Pearce - businesswoman, Chair of Suffolk Institute of Directors and member of Suffolk ProHelp - will share some of her experiences in building a company from £500K to £5m.

One life Suffolk: During this difficult time, OneLife Suffolk is continuing to offer FREE services from home. Please see OneLife website, <https://onelifesuffolk.co.uk/> for more information about how they can support families, or call 01473 718193.

Useful Websites (any new guidance is in RED)

The existing guidance is being updated extremely regularly so please check any guidance relevant to your area to ensure that you are accessing the most up to date version. We are not including in this table all the published material but some of the key guidance that would be relevant to Suffolk County Council and our partners

	Title	Who For	Comments
--	-------	---------	----------

NEW	Safe working in education, childcare and children's social care	all staff in educational, childcare and children's social care settings children, young people and other learners parents	Preventing and controlling infection, including the use of PPE, in education, childcare and children's social care settings during the coronavirus outbreak. It applies to: - children's homes, including secure children's homes - residential special schools or colleges - fostering services - visits to family homes - alternative provision - early years and childcare settings - schools, including special schools - colleges, including specialist post-16 institutions
